# REVISED SAMPLE RATINGS OPTIONS

9/1/22

All CLO fit samples should have both Primary and Secondary Sample Ratings completed. See next slide for complete list, along with how to apply them.

The screenshot shows the URBAN PLM system interface for a Fit Evaluation. The top navigation bar includes the URBAN PLM logo, navigation arrows, a 'Purchase Order' dropdown, a 'Quick Search' input field, and a 'Go' button. The left sidebar shows the 'DESIGN CENTER' menu with options for 'DESIGN CENTER DASHBOARD' and 'Fit Evaluation'. The main content area is titled 'Fit Evaluation: 153692' and includes tabs for 'Overview', 'Attachments', and 'Change Tracking'. The 'Overview' tab is active, displaying a grid of fields organized into three columns: Evaluation Information, Item Information, and Sample Information. The 'Evaluation Information' column includes fields for Agent (INT, S.A.), Vendor (INT, S.A.), UIM (EA), Fit Eval Status (NEW), Fit Approval Date, and Number Format (Fraction). The 'Item Information' column includes fields for Fit Description (K1 TOLERANCE), Designer (STEVE GAMBOA), Tech Designer (JENNIFER ASTON), and Created On (2022-07-15 15:51:02). The 'Sample Information' column includes fields for Sample No (Sample 2), SampleRequest ID (436720), Sample Type (REF), SampleStatus (NEW), Date Fit (07/15/2022), Fit Eval Tech (JENNIFER ASTON), Sample Measurer, Primary Tech Sample Rating, Secondary Tech Sample Rating, and Description. The 'Fit Session Attendees' field is also present. The bottom of the page shows a 'PRODUCTION' button.

# REVISED SAMPLE RATINGS

## OPTIONS ctd

9/1/2022

Primary Sample Rating & definition:	RESTYLED - the garment design intent is being changed from original setup intent and causing need to see new sample/new style#	DESIGN DETAIL CHANGE - Where styling changes warrant new fit sample, but not new style number, i.e. Moved Seams, added pintucks, darts etc	CONSTRUCTION - a major construction change or issue is causing need to see another sample	FIT/SPEC/BALANCE - sample cannot be approved due to any of these reasons or combo of these reasons	COST - sample cannot be approve due to major cost changes	ALIGNMENT - any combination of design/buying/pd/tech/vendor not being on same page about design/fit intent	MULTIPLE - multiple combination of major issues	FABRIC/TRIM/WASH - any issues with fabric/trim/wash that are causing this garment to NOT be fit approved
Green = Secondary Sample rating that can be used under this primary rating:	fit/balance issues	fit/balance issues	fit/balance issues	fit/balance issues	fit/balance issues	fit/balance issues	fit/balance issues	fit/balance issues

# New POM: FABRIC WEFT 5IN STRETCH TO

POM Code= FW5IN

POM to be 1st POM on grade and recorded at each fit.

- Alert vendors that POM must be advised on any virtual approvals
- Ensure at TOP stage that correct tolerance is updated in TS

Example: fabric = W2. Thru development tech used W1.

Change tolerance to W2 at TOP stage

- If an issue arises, outside of true tolerance:

Create DC only POM page and update tolerances for each POM accordingly.

Example: hip -1". Team decides acceptable. Update tolerance to be -1" on DC only page so does not get stuck in DC.

When creating DC only page, **the vendor must be blank;** completely delete the vendor.

# New POM: FABRIC WEFT 5IN STRETCH TO

DENIM/STRUCTURE TOLERANCES		
		tolerance
W1	All non washed and light washed fabrics	
	Weft Stretch: 5" extends up to 6 1/4"	1/8
W2	All heavy washed and garment dyed	
	Multiple wash finishes	
	Weft stretch: 5" extends up to 7 3/8"	3/8
W3	Gummy/super stretch fabric	
	Weft stretch: 5" extends 7 1/2" and over	1/2
	*leg openings on skinny doesn't get W3 unless raw edge	
	*WB should not be W3
