

Did you know...

you can track PO Date and Qty changes in Qlik?

The Tradestone – PO Changetracking app allows for users to track changes made to a PO...

- Update cadence = Daily
- PO Cancel Date >= 1/1/2020
- PO Status = OP, Closed, Cancel

Users can see the original Qty and FOB \$ on order, even if a PO is Cancelled – use the PO OG FOB \$ & QTY screen...

Users must make a few selections (filters) for the report to populate:

- Date (Cancel, Ship, or OG (original) Cancel)
- Brand (brand, division, or class)
- Selling Channel, Design Source, or Commodity

Once selections are made, the report will show the OG FOB \$ and OG Qty on a PO

For Cancelled POs, the current QTY will = 0

For OP or Closed, users can compare Qty on order to the OG Qty or Receipt Qty

Users can also track if POs have been shifted Early, Delayed, or Same Month on the PO Date Shift screen...

A button will auto-select a few dimension/measures to populate the report – users may be prompted to make additional selections

These Measures/Dimensions determine the fields that will populate on the report to the right

The tabbed fields (Cancel Month, etc.) are filterable, and can be dragged to change the report view

**Measures**

- TTL Price A
- OG\_FOB
- OG\_Price\_A
- OG\_Retail
- TTL ELC
- TTL FOB
- TTL Inv

**Dimensions**

- CANCEL\_DATE\_SHIFT
- CANCEL\_MONTH
- OG\_CANCEL\_MONTH

**Early, Same Month, or Delayed**
